KEY	
Research voyage days	Ship days for the science project(s) including estimated project mobilisation and demobilisation days - refer Voyage Plan. In practice, within operational constraints, the ship will sail when mobilisation is completed and not necessarily as originally planned.
MNF equipment days	Ship days for mobilisation and demobilisation of MNF equipment
Sea trials	Ship days for calibration, testing and training which include trials equipment mobilisation and demobilisation – refer Trials Voyage Plan.
Port period	Ship days in port including ship maintenance, bunkering and stores activities.
Transit voyage days	Ship days to geographically link primary voyages. Science projects will be allocated through the Supplementary applications process and days allocated will include science project mobilisation, demobilisation and any additional sea time required – refer Transit Voyage Plan.
